*left to right bottles made with 10%, 20%, 30% Oshenite™*

**What does “made with Oshenite” mean?**

*Oshenite™ is an ultra pure Renewable & Sustainable performance mineral from the pristine waters of the Bahama Bank. Using Oshenite™ lessens dependence on fossil fuels. Oshenite’s unique crystalline structure allows you to reduce your plastic resin usage by up to 50%! Adding Oshenite™ provides down gauging options while enhancing the physical and performance characteristics of your product. If you are looking to produce more environmentally responsible packaging with a renewable resource that offers economic benefits and improved product performance, then choose Oshenite™.*
